

Bebosoft releases Forms To Go 4.1

Published on 10/13/08

Bebosoft, Inc. announced today the release of Forms To Go 4.1, the latest version of their form to email script generator for HTML forms for Mac OS X and Windows XP/Vista. Forms To Go creates form to email scripts in PHP, ASP and Perl. Version 4.1 includes support for the popular PHPMailer class, as well lots of enhancements and bug fixes.

Ft. Lauderdale, Florida - Bebosoft, Inc. announced today the release of Forms To Go 4.1, the latest version of their form to email script generator for HTML forms for Mac OS X and Windows XP/Vista. Forms To Go 4.1 includes support for the popular PHPMailer class, as well lots of enhancements and bug fixes. Forms To Go creates form to email scripts in PHP, ASP and Perl.

With Forms To Go, web designers can easily create unlimited scripts to process HTML forms in PHP, ASP and Perl for unlimited domains. Forms To Go's innovative design removes the development headaches usually associated with script creation and customization, providing an ideal solution for web designers with no programming knowledge to create form to email scripts.

Create powerful scripts by accepting file uploads in the HTML forms, dump the field values to different databases, perform different types of field validation to ensure the quality of the data, secure your forms against spammers by using captchas, stopwords, filter email injection, form hijacking and more.

Pricing and Availability:

The license costs \$30 (USD) for the single language edition: PHP, ASP or Perl or \$70 (USD) for the multi language edition. License includes 1 year of free updates. Free trial download is available at Bebosoft.
