

Risky Business SOS WorkPlace Risk Assessment and Safety Application

Published on 04/19/07

Risky Business SOS is a software program designed to simplify and guide a company through the task of documenting their Safe Operating Procedures. Every organization has a legal obligation to the community and their employees to identify, assess, control and document the hazards, substances and procedures at their workplace. This software application is designed to aid compliance with these regulations. Risky Business SOS is a register of your Company's Policies, Procedures and Incidents.

Risky Business SOS is a software program designed to simplify and guide a company through the task of documenting their Safe Operating Procedures (SOPs). Every organization has a legal obligation to the community and their employees to identify, assess, control and document the hazards, substances and procedures at their workplace. This software application is designed to aid compliance with these regulations.

Risky Business SOS is a register of your Company's Policies, Procedures, Substances, Hazards, Incidents and Risk Assessments. Single Computer (\$1499 USD) and Server versions are available.

New Features:

- * Public Liability module added: Incidents can now track various details (file, notes, meetings etc) with respect to public liability claims made against the company.
- * Eye-witnesses and injured visitors can be added to an incident record.
- * Added a Google-like instant search menu.
- * Australian Standard 4360: Added a dialog warning to the user to re-evaluate the Residual Risk after adding a new corrective action or risk control.
- * Added a Change user password menu and dialog.

A free MacOS X or Windows demo version is available from
