

## 24U Software releases 24U Toolbox Plug-In 1.1.1

Published on 09/28/11

FileMaker solutions provider, 24U Software today announces 24U Toolbox Plug-In 1.1.1, an important update to their popular data processing extension for FileMaker Pro 11. The new version of 24U Toolbox Plug-In has been updated to run in FileMaker Pro 11 on the most recent versions of Mac OS X and Windows. It also sports new useful functions and capability to be used as a server plug-in for server-side scripts and web publishing on FileMaker Server and FileMaker Server Advanced.

Prague, CZ - 24U Software today is pleased to announce the release and immediate availability of 24U Toolbox Plug-In 1.1.1 for FileMaker Pro 11. The new version of 24U Toolbox Plug-In has been updated to run in FileMaker Pro 11 on the most recent versions of Mac OS X and Windows. It also sports new useful functions and capability to be used as a server plug-in for server-side scripts and web publishing on FileMaker Server and FileMaker Server Advanced.

What's new in version 1.1.1:

- \* Application-wide globals let developers shared variables between FileMaker files
- \* Precise timestamps allow for measuring of time with microsecond precision
- \* Value type checking can be used to check data type of values passed to calculations
- \* Auto Update savvy version function simplifies automated deployment and updates
- \* Server-side functionality helps creating powerful server-side scripts and web solutions

Other Features include:

- \* Execute system scripts (Bash, Perl, PHP, Python, AppleScript, BAT, VBS)
- \* Execute SQL on the current database
- \* Count and substitute text using Regular Expression patterns
- \* Find out which special windows (Script Debugger, Data Viewer) are open
- \* Merge fields and variables into text (faster than using Substitute)
- \* Get the client's public IP address

Use 24U Toolbox Plug-In to add a completely new dimension to your server-side data processing

Server-side scripts can be efficiently used with FileMaker Server 11 for nightly batch data imports and processing. The powerful features of 24U Toolbox Plug-in let you make this processing much faster and more powerful by being able to use system-level scripts, access your data with SQL queries, merging fields and variables into text, etc.

"For a customer project I need to download data from several websites, import the data into a FileMaker database, parse the HTML, and extract thousands of records from the imported data every day." said HOnza Koudelka, Software Division Manager of 24U. "I am using Toolbox Plug-In to trigger curl to download the web pages, SimpleFile to import the downloaded files, and then Toolbox Plug-In again to help with fast parsing and preprocessing of the data. The text merging feature of Toolbox lets me even recognize graphical symbols such as smilies and translate them to text equivalents."

24U Toolbox Plug-In is designed to help FileMaker developers in their daily work by providing a solid toolbox of the most commonly needed simple but powerful functions.

Requirements and Compatibility:

24U Toolbox Plug-In 1.1.1 requires Mac OS X 10.4 or newer and FileMaker Pro 8.5 or newer. Recommended is Mac OS X 10.6 Snow Leopard and FileMaker Pro 11 Advanced. Windows XP SP3 and FileMaker Pro 8.5 are minimum requirements for using the plug-in on the Windows
