

MileBug LITE for iPhone/iPod Touch released

Published on 10/25/08

iZATT has released MileBug LITE, a lite version of the most popular miles tracking app for the iPhone and iPod Touch. MileBug LITE is fully functional and available for \$2.99. The only difference is a restriction to 10 trips recorded before a report must be sent and the trip log reset. Then record 10 more. Repeat. MileBug LITE provides the option to track miles or kilometers, enter custom rates, and include foreign characters in the reports. MileBug LITE also supports Spanish.

American Fork, Utah - MileBug LITE, a lite version of the premier iPhone mileage log application, is now available for only \$2.99 (compared with \$6.99 for Standard). MileBug LITE helps those driving their own vehicles for business, charity, medical, or other reasons receive their reimbursement and/or tax deduction. In the U.S., IRS business rates are up to 58.5 cents/mile. MileBug LITE for the iPhone/iPod Touch helps people track their miles and provides emailed reports for easy submission to employers, accountants, and the IRS.

What's New?

- * Option for kilometers vs miles (General Settings)
- * Custom deduction rates
- * Define multiple business rates (reimbursement vs. deduction)
- * "Other" business category for percentage tax filers
- * Foreign and other special characters supported in reports
- * Notes included in reports
- * SPANISH version

MileBug LITE answers the call from the many international customers. Inside the General Settings is now an option to select kilometers instead of miles. From within the Presets, users can define custom rates for business, charity, medical, and other categories. If you get one rate from your employer for reimbursement, and another rate from the IRS for your side business, you simply create two different business rates.

As an added bonus, MileBug LITE supports Spanish. Simply select Spanish as the language of your iPhone or iPod Touch in the General Settings --> International area and restart MileBug LITE. Bienvenido a MileBug!
