

## **Norrkross Movie Released**

Published on 04/21/07

Norrkross Software, the development company behind the widely acclaimed Norrkross MorphX, is introducing its latest software addition; a video effects, compositing and editing application exclusively for the OS X platform.

Use Norrkross movie to edit video in multiple layered tracks, add your own movie titles or use the amazing green screen effect to really boost your amateur movie to a whole new level. The beautiful, simple user interface will quickly get you started with little or no training.

So let your imagination free and start filming that old dream of yours. It's easy to export the final result to every major video format making this the ideal application for both DVD quality flicks and Internet movies. The choice is yours, moviemaker.

During the introduction phase of this multi purpose application, we are offering Norrkross Movie for as little as \$59. The original list price is \$79.

Key features:

- \* Real time, non-destructive, video effects
- \* Easily arrange sequences of video clips, still images and sound layers
- \* Unlimited layers with transparency compositing
- \* Build complex trees of effects and composite actions using nodal compositing
- \* Animate attributes using key frames
- \* Export to popular formats
