

Arten Science releases Pointer+, Cursor Enhancement Software for OSX

Published on 10/28/08

Arten Science is proud to announce Pointer+. Pointer+ is a simple, inexpensive, very focused application that adds additional functionality at the press of a key. Functionality that is invaluable if you are using your computer to demonstrate software to a third party, or if using any sort of screen recording software.

Derbyshire, UK - Arten Science is proud to announce Pointer+. Pointer+ is a simple, inexpensive, very focused application for your Mac that adds additional functionality at the press of a key. Functionality that is invaluable if you are using your computer to demonstrate software to a third party, or if using any sort of screen recording software.

- * Hotkey Operation
- * Circular Pointer Overlay
- * Target Cross-Hairs when Click
- * Magnify at Pointer
- * Snapshot the Magnified Image
- * Unlimited Use, Trial Version

When using your computer to demonstrate software to a third party, or when creating a screen-cast or screen recording, Pointer+ can help by making your mouse cursor more visible and giving visual feedback in the form of a target cross-hairs when the mouse is clicked.

In addition you can define (in pixels) the size of a magnification area that you can activate using a hotkey and drag around the screen. If you wish to capture that area of magnified screen as an image, this can easily be done by using another Hotkey.

Pointer+ has no dock icon or standard menu. When running Pointer+ it displays 'P+' in the status menu. From here you can view the About window and access the Preferences. Ideally Pointer+ would be setup to run as a Login Item so that it is launched automatically when you start your computer.

Minimum Requirements:

- * Mac OS X Version 10.5 Leopard or higher
- * Universal Binary for PowerPC and Intel
- * G4 Processor, 1GHz or faster
- * 10 MB Hard Drive space

Pricing and Availability:

Purchase Price 5.00 / \$7.80 / 6.25 Euro. A trial version of Pointer+ is available for download. The trial version is unrestricted but does show the words 'Trial Version' in a screen overlay. As with all our products Pointer+ remains free of charge to educational and charity organisations.

Arten Science was setup in the UK in 2007 to design, develop and market quality commercial software for the Apple Mac OSX (Universal Binary), Windows XP / Vista and Linux with GTK+ 2.x. We also provide Bespoke Software Development and Technology, Database and Security Consultancy services. In addition to creating new solutions for our customers, all of our commercial products can be tailored, modified and enhanced to suit your specific requirements. Arten Science is currently working on ArtenSUITE, our next generation, cross platform Application Development Framework. This will be used by ourselves and others to bring business applications to the Mac OSX and Linux platforms as well as continuing to support Windows XP and Vista. Arten Science can help you to use software to solve business problems and create business opportunities. All our Products are supplied free of charge to educational and charity organisations. Customers include Schools, Universities, Military, Churches, Youth Groups etc. Contact Arten Science for further information.
