

Nisus Software, Inc. Releases Nisus Writer Pro 1.2

Published on 11/06/08

Nisus Software today announces the release of Nisus Writer Pro 1.2, the latest version of our critically acclaimed word processor. This new version adds a new file importer, automatically updating time stamps, Flesch and Kincaid reading ease scores, new Table of Contents features, additional backup options, a Macroize menu, and editable document properties.

Solana Beach, CA - Nisus Software today announces the release of Nisus Writer Pro 1.2, the latest version of our critically acclaimed word processor. Nisus Writer Pro 1.2 adds a completely new file importer. The new importer greatly improves file translations, especially for the .doc format. Additionally, export as Word file format (.doc) and the Open Document (.odt) format has been added.

The Table of Contents feature has a few new options: tab/backtab can be used to promote or demote TOC levels, and TOC entries can be rearranged by drag and drop within the navigator pane.

Other new features include automatically updating time stamps, Flesch and Kincaid reading ease scores, additional backup options, a Macroize menu, and editable document properties (author, company, copyright, etc.).

There have also been additions to the Nisus Macro Language, and a host of bug fixes and other enhancements.

These new features add to an already rich feature set that includes an intuitive interface, multilingual text support, easy to use style system, non-contiguous selection, full screen mode, and a native file format (RTF) that almost any word processor can read.

System Requirements:

Nisus Writer Pro 1.2 is a universal binary and requires Mac OS 10.4 (Tiger) or later.
