

Acqualia announces Picturesque - Beautify images with drag and drop

Published on 04/24/07

Acqualia today announced the release of Picturesque, a brand new "drag and drop" style app designed to make images look gorgeous for the web.

With tasteful effects like reflections, glows, shadows, curves, soft fades and strokes, Picturesque adds a final touch to your images that will leave visitors to your site impressed.

Picturesque can also beautify images in batch, and with the ability to resize and apply effects on a whole folder of images, Picturesque is an easy way to make sophisticated thumbnails and refined full sized images.

Picturesque is available today for a free download, and is priced at \$19.50. The only limitation before registering is a watermark on saving.
