

Meadows Releases XTensions for QuarkXPress 8

Published on 11/13/08

Meadows Publishing Solutions is pleased to announce the release of Batch Print and Grabber XTensions for QuarkXPress v8 Macintosh. Batch Print prints hundreds of documents automatically, handling every aspect of the printing operation, including one-time page/print setup, automatic picture updates, separation of spot colors, EPS font and color management, and more. The Grabbers are a set of XTensions for QuarkXPress that will change the way you work with QuarkXPress forever.

Schaumburg, IL - Meadows Publishing Solutions is pleased to announce the release of Batch Print and the Grabber XTensions for QuarkXPress v8 for the Macintosh platform.

Batch Print prints hundreds of documents automatically, handling every aspect of the printing operation, including one-time page/print setup, automatic picture updates, separation of spot colors, EPS font and color management, and more. Batch Print is ideal for high-volume printing environments where groups of documents must be printed quickly, easily, and without the need for user-intervention!

The Grabbers are a set of XTensions(TM) for QuarkXPress(TM) that will change the way you work with QuarkXPress forever. Each one uses the incredibly simple "marquee" method of text and element selection. Forget about drag-selecting the old-fashioned way--just click one of our tools, drag a marquee around the page area you wish to modify, release the mouse and the Grabber dialog box appears. Fill in the dialog and click "OK." The Grabber applies the specified changes automatically. We have Grabber XTensions for changing character attributes and tab settings, performing mathematical calculations, and enhancing the cut, copy and paste features!

Batch Print and the Grabbers have been invaluable tools for QuarkXPress users, and their compatibility with QuarkXpress 8 ensures that they will continue to enhance productivity.
