

## **A Better Finder Attributes 4.8 removes file dates**

Published on 11/12/08

publicspace.net is proud to announce version A Better Finder Attributes 4.8. Version 4.8 adds to its plethora of file and digital camera date and time manipulation features, by adding the ability to remove file creation and modification dates. The new version also features improved preview and error handling. A Better Finder Attributes has long been known to post-production and digital media producers for its ability to change Finder attributes, such as file creation and modification dates.

Luxembourg City, Luxembourg - publicspace.net is proud to announce version A Better Finder Attributes 4.8. Version 4.8 adds to its plethora of file and digital camera date and time manipulation features, by adding the ability to remove file creation and modification dates. The new version also features improved preview and error handling.

A Better Finder Attributes has long been known to post-production and digital media producers for its ability to change Finder attributes, such as file creation and modification dates.

A Better Finder Attributes can be used as a stand-alone application, dragging & dropping files onto the application icon or directly into the file list window. Alternatively you can use it straight from the Finder using either the contextual menu or the command-control-A hot key combination.

### Minimum Requirements:

- \* Mac OS X 10.5 Leopard compatible
- \* Universal Binary for PowerPC and Intel

Recent releases have brought it to a larger audience of digital photography amateurs and professionals by adding the ability to batch adjust the Exchangeable Image File (EXIF) time and date that JPEG pictures were shot to compensate for time zone errors or incorrectly set camera clocks.

### Pricing and Availability:

A Better Finder Attributes remains priced at \$14.95 (USD). Family, Business and Enterprise Licensing is available.
