

unmarked software Releases TextSoap 6.0.1 Update

Published on 11/13/08

unmarked software today announces the release and immediate availability of TextSoap 6.0.1, an update to its text processing utility for Mac OS X. The TextSoap 6.0.1 update is a maintenance release that fixes a number of reported issues and adds several minor enhancements, including plugin support for Coda 1.6. Take total control of text and its style. With a single menu selection TextSoap 6 brings unique processing power to users from within their favorite application.

Vancouver, Washington - unmarked software today announces the release and immediate availability of TextSoap(R) 6.0.1, an update to its text processing utility for Mac OS X. The TextSoap 6.0.1 update is a maintenance release that fixes a number of reported issues and adds several minor enhancements, including a new plugin to support Coda 1.6.

The update also addresses an issue that prevented some older serial numbers from being recognized when upgrading. A complete list of changes is documented in the TextSoap 6 History page.

Supported Languages:

- * US English

System Requirements:

- * Requires Mac OS X v10.5 or later
- * Universal Binary: Works great on both Intel and PowerPC
- * 14 MB hard Drive space

Take total control of text and its style. Whether it is Mail, AppleWorks, BBEdit, or TextEdit, TextSoap provides integration options such as Services Menu support, Shortcut Menu and Application plug-ins. With a single menu selection TextSoap 6 brings unique processing power to users from within their favorite application.

Pricing and Availability:

TextSoap 6 is available now directly from unmarked software. Pricing for new customers starts at \$39.95 (USD). Upgrades for users of TextSoap 4 and 5 start at \$24.95 (USD).
