

## **FileMaker Buttons and Icons Series**

Published on 04/26/07

FMWebschool has created several professional button series to use with FileMaker Pro. The button series offer a consistent and uniform look that gives an air of professionalism to the user interface of solutions. The transparent backgrounds allow them to blend seamlessly into the background of any layout.

Glen Allen, Va – April 26, 2007 – FMWebschool, Inc. Announces Professional Buttons and Icons for FileMaker Pro. FMWebschool has created several professional button series to use with FileMaker Pro. The button series offer a consistent and uniform look that gives an air of professionalism to the user interface of solutions. The transparent backgrounds allow them to blend seamlessly into the background of any layout.

While there are many sites with free buttons and icons, why spend hours on the web searching for icons that look like they belong together when FMWebschool's buttons follow the logical flow of FileMaker development. Our icon series were created specifically with FileMaker functionality in mind.

How do we know what developers want? FMWebschool has been providing custom FileMaker solutions since 1999. We work with FileMaker on a daily basis and this gives us a great understanding of the icons necessary to create a more pleasing professional interface. All of the FileMaker buttons are hand drawn by a professional on-staff graphic artist.

The buttons and icons are not limited to FileMaker; many developers have used them on their websites and in newsletters. The 3-D buttons come in hundreds of categories and are available in Jpeg and Gif formats.

Save time, and give your database or website that professional look with FMWebschool's professional button and icons series. Your customers will thank you!

To see examples of the FileMaker button and icons series, please visit our website.
