

"Give Good Food to your Mac" has HoudahSpot and HoudahGeo on the menu

Published on 11/18/08

Houdah Software is pleased to announce their participation in the Third Edition of Give Good Food to Your Mac. This promotion is organised by Indie developers from all over the world. Diversity and quality are main features of this community action. Every Mac user can download and taste more than 60 apps and enjoy discounts ranging from 20% to 50%. The menu includes HoudahSpot and HoudahGeo.

Luxembourg - Houdah Software is pleased to announce their participation in the Third Edition of 'Give Good Food to Your Mac'. This promotion is organised by Indie developers from all over the world. Diversity and quality are main features of this community action. Every Mac user can download and taste more than 60 apps and enjoy discounts ranging from 20% to 50%. The menu includes HoudahSpot and HoudahGeo.

From the 17th to the 30th of November 2008, Mac users can create their own cocktail of apps and enjoy increasing discounts starting at 20% for 3 apps and up to an amazing 50% for 5 apps or more.

Claudia Zimmer, Aquafadas' CEO explains, We are pleased to introduce the Third Edition of 'Give Good Food to your Mac'. It's a chance for us to build a community among developers and together, create opportunities that would not be possible alone. Mac users benefit from it as they can discover our software at great prices.

HoudahSpot is Houdah Software's bestselling file search tool for the Mac. Unleash the full power of Spotlight to find, manage and clean up your files.

- * Keep frequently used files within reach
- * Retrieve the files you didn't know you still had.
- * More precise than Spotlight: pinpoint files using a myriad of criteria
- * More detailed than Spotlight: show any number of file attributes
- * Fully customizable: set your preferred criteria, columns and sort order
- * BlitzSearch: the ease of use of Spotlight, the power of HoudahSpot

HoudahGeo is a pure software solution for geocoding photos with latitude, longitude and altitude information. Just like a GPS camera, HoudahGeo can store this information right within the image file - invisibly with no loss of quality.

Unlike a GPS camera, HoudahGeo allows you to export your photos directly to Google Earth or Flickr! More features, more flexibility, more control. Lower price tag.

The products on the menu are :
