

A.I.Disk rebrands as OneDisk: the missing link between iDisk and iPhone

Published on 11/21/08

Readdle today rebrands its A.I.Disk application as OneDisk to reflect its wide usage as iPhone and iPod Touch connection link to multiple online file storage services at once. OneDisk improves iWork documents support and provides new file management capabilities. Now the users can compress documents into zip archives to reduce iPhone disk space usage or before sending them via email, as well as rename files and folders directly on their devices.

Odessa, Ukraine - Readdle today rebrands its A.I.Disk application as OneDisk to reflect its wide usage as iPhone and iPod Touch connection link to multiple online file storage services at once. Also, OneDisk improves iWork documents support and provides new file management capabilities.

The OneDisk is an iPhone application that lets people access documents on the MobileMe iDisk and other online storage services, transfer them to iPhones and iPod Touches, view on the go and even share with friends and colleagues. OneDisk has a built-in file viewer that supports a number of formats including MS Office and iWork documents, PDF, TXT, HTML and others making OneDisk extremely versatile. Also, any document that is stored in OneDisk can be sent by email to anyone in the world.

"Firstly, when we aimed to help MobileMe iDisk subscribers connect to the iDisk from their iPhones and iPods, our application was widely adopted by users of Box.Net and MyDisk.se. More surprisingly, it appears that many MobileMe subscribers are extensively using other online storages at the same time. As a result, we decided to rename A.I.Disk to OneDisk, because this name better describes its actual usage", explains Alexander Tyagulsky, Readdle CMO.

OneDisk in comparison with A.I.Disk has improved iWork documents support and new file management capabilities. Now the users can compress documents into zip archives to reduce iPhone disk space usage or before sending them via email, as well as rename files and folders directly on their devices.

Pricing and Availability:

OneDisk is available for \$7.99 (USD) and available exclusively at the App Store.
