

## **Tension Software releases Invoices 1.1**

Published on 04/28/07

Invoices let you manage and print your business invoices with a powerful program encapsulated inside an easy and simple interface. Invoices uses the last Apple Cocoa technology, Core Data based on a SQL native OS X engine and Universal Binary technology to have full speed on both PPC Mac and Intel Mac.

### **FOR IMMEDIATE RELEASE**

Tension Software releases Invoices 1.1. Invoices let you manage and print your business invoices with a powerful program encapsulated inside an easy and simple interface. Invoices uses the last Apple Cocoa technology, Core Data based on a SQL native OS X engine and Universal Binary technology to have full speed on both PPC Mac and Intel Mac.

Invoices let you manage and print business invoices with a powerful program encapsulated inside an easy and simple interface. Invoices uses the last Apple Cocoa technology, Core Data based on a SQL native OS X engine and Universal Binary technology to have full speed on both PPC Mac and Intel Mac. Invoices can be created and edited easily. Customers, goods/services description and notes can be inserted using autofill functions to avoid repetitive tasks. Labels and tax setting can be customized to adapt the software to your country or state.

#### **Version 1.1 Additions:**

- \* Payed/Unpayed checkmark in invoices table
- \* Subtotal hide if no tax in settings
- \* Optional number and date format as in system pref
- \* Optional date format YYMMDD
- \* Bug solved in address format
- \* Added Duplicate invoice command
- \* Bug solved in currency display
- \* Notefield with scrollbar
- \* Currency in the invoice table
- \* Autoupdate check from preferences
- \* Other internal bug solved
- \* Internal algorithm optimization

Invoices 1.1 is only \$35.00 USD.
