

Zevrix Solutions Announces Adobe CS4 Compatibility of Its Software

Published on 11/25/08

Zevrix Solutions announces the compatibility of its products with the Adobe Creative Suite 4 software. Zevrix products include popular plug-ins for Adobe InDesign and Illustrator, such as BatchOutput, LinkOptimizer and InPreflight. The Zevrix products allow to automate the output from InDesign, save disk space and production time through image optimization and automated packaging, and eliminate errors with thorough preflighting.

Toronto (ON), Canada - Zevrix Solutions announced today the compatibility of its products with the Adobe Creative Suite 4 software. Zevrix Solutions products include several popular plug-ins for Adobe InDesign, Photoshop and Illustrator which help professionals achieve more while doing less through automating their everyday tasks, producing error-free documents, saving disk space and cutting production costs.

The following products are now compatible with Adobe Creative Suite 4:

LinkOptimizer 3.2.4 is a workflow solution to automatically reduce the size of images linked to InDesign documents by eliminating excessive image data. LinkOptimizer helps users save valuable storage space, time and reduce production costs in various ways by reducing the size of images linked to InDesign documents. A similar application, ArtOptimizer, is available for Adobe Illustrator.

BatchOutput 3.2 is a powerful professional solution to automate printing and exporting to PDF, PostScript, EPS and JPEG of multiple and single InDesign documents. Users can also export InDesign documents as single pages, assign variable file names, update modified links during processing, and process files in the background.

BatchOutput Server 4.1 automates the entire InDesign output workflow by processing files from network-based hotfolders. It frees up operator stations from the output process and allows for a single set of output settings for an entire workgroup.

InPreflight 2.6.1 is a comprehensive quality control, file packaging and reporting solution for Adobe InDesign which saves users hours of checking the documents manually and dealing with consequences of costly mistakes. InPreflight also allows users to preflight and package multiple documents, eliminating the need to collect the same links multiple times for each design.

Pricing and Availability

All Zevrix products run on Mac OS X 10.4.2 or later (including Leopard), are Universal Binaries, and work with Adobe CS, CS2, CS3 and CS4. All products can be purchased from the Zevrix Solutions website, as well as from authorized resellers.
