

Pixelmator Team Releases Pixelmator 1.3.1

Published on 11/26/08

The Pixelmator Team today released Pixelmator 1.3.1, an update to the revolutionary GPU-powered image-editing tool that provides everything needed to create, edit, and enhance still images. Available today as a free software update, Pixelmator 1.3.1 features a new Color Management sheet, a new Refine Selection tool, and more.

London, UK - The Pixelmator Team today released Pixelmator 1.3.1, an update to the revolutionary GPU-powered image-editing tool that provides everything needed to create, edit, and enhance still images. Available today as a free software update, Pixelmator 1.3.1 features a new Color Management sheet, a new Refine Selection tool, and more.

Since color management is a hard to understand part of image editing Pixelmator 1.3.1 fixes that by delivering new Color Management sheet. Color Management sheet is a single, easy-to-use place for managing color profiles in images and still keeps all the functionality of previous Assign to Profile and Match to Profile tools.

P
selections made with selection tools. Refine Selection now features Smooth, Feather and Size settings and works in real-time showing the results instantly. Other new and improved features in Pixelmator 1.3.1 include improved Type tool stability, minor user interface and compatibility improvements, and some bug fixes.

Pricing and Availability

Pixelmator 1.3.1 is available to order for \$59 (USD). Pixelmator 1.3.1 is a free update to current Pixelmator customers. System requirements, as well as a 30-day Pixelmator trial and more information on Pixelmator, can be found at their website.
