

Split bills, add tips, and calculate exchange rates with Globe Tipper

Published on 12/21/11

Houston-based Vapssky Technologies today introduces Globe Tipper 1.0, their new travel app for iOS. Globe Tipper provides tipping and exchange rate data in one handy package. It is a multipurpose travel tool that allows users to split bills, check worldwide tipping customs, & calculate currency exchanges. Globe Tipper can divide restaurant bills evenly or by item, and additional options allow users to allocate shared items among groups & to adjust an individual party's contribution to the meal.

Houston, Texas - Vapssky Technologies, an established mobile application and games developer, has today announced the launch of Globe Tipper in the Apple App Store. Compatible with the iPhone, iPad, and iPod touch, Globe Tipper is a multipurpose travel tool that allows users to split bills, check worldwide tipping customs, and calculate currency exchanges. Globe Tipper is currently available for download in the Apple App Store for \$0.99 in the Travel category.

Travelers on-the-move need information at their fingertips, and Globe Tipper provides tipping and exchange rate data in one handy package. Globe Tipper has recommendations on how much to tip waitstaff and bellhops in 70 of the world's most frequently visited countries, so globetrotters never have to wonder whether they're offending the locals or getting taken for a ride.

Furthermore, Globe Tipper has access to every internationally-recognized currency in the world, and users can create personal lists of the currencies most relevant to them. Every time that Globe Tipper is opened while the user's device is connected to the internet, Globe Tipper updates the user's exchange rates from Yahoo! Finance. This update takes place in the background and ensures that users have the most up-to-date information while enjoying fast, delay-free service on their iOS devices.

While Globe Tipper is great for travel, many users will get the most out of this app in their hometowns. Globe Tipper's tip calculator allows users to determine restaurant tips based on the tip percentage of their choosing, and this app's bill split functions divide restaurant bills with as much simplicity or sophistication as users desire. Globe Tipper can divide restaurant bills evenly or by item, and additional options allow users to allocate shared items among groups and to adjust an individual party's contribution to the meal.

All in all, Globe Tipper is indispensable for people who find themselves out and about, whether overseas or around town. Globe Tipper's bill splitting, tip calculation, and exchange rate functions make short work of tasks that bedevil even the savviest diners and travelers.

Device Requirements:
