

NetSketch 1.4 adds drawing replay and rich community integration

Published on 12/05/08

Gotow.net is pleased to announce the release of NetSketch 1.4, a collaborative drawing application for the iPhone and iPod Touch. NetSketch sports a powerful vector graphics engine that has been fine-tuned for mobile artists. Create detailed drawings with infinite pan and zoom, a full-spectrum color picker, and a fast eyedropper tool. Version 1.4 adds the much-requested replay feature and a new community browser.

Blacksburg, VA - Gotow.net is pleased to announce the release of NetSketch 1.4, a collaborative drawing application for the iPhone and iPod Touch. NetSketch sports a powerful vector graphics engine that has been fine-tuned for mobile artists. Create detailed drawings with infinite pan and zoom, a full-spectrum color picker, and a fast eyedropper tool. Take NetSketch to a meeting or lecture and use it's WiFi sharing features to draw with people on other iPhones in real-time. Version 1.4 adds the much-requested replay feature and a new community browser!

Since it's release, NetSketch has included an online community where users can post their work. Now, you can watch replays of drawings by other NetSketch users, leave comments, and explore the best of NetSketch - without leaving the app! Explore thousands of drawings uploaded to My NetSketch and upload your own work for a community experience unmatched in other drawing apps.

About Netsketch

NetSketch allows you to draw on the iPod's screen using a full range of colors and brush sizes. You can share drawings over the wireless network, and others using the NetSketch application can contribute to your work. As you draw, everyone's changes are reflected in real time.

Unlike other drawing programs, NetSketch features infinite pan and zoom based on familiar gestures. It is the only iPhone app to render drawings in a fully scalable vector space independent of the size of the iPhone's screen. When you zoom in, you get smooth, accurate lines - not huge pixels.

System Requirements:

iPhone or iPod Touch. Wireless network required for collaboration and community features.

Pricing and Availability:

NetSketch is \$5.99 (USD), and is available for immediate download on the iTunes App Store. For a free promotional copy of NetSketch 1.4 and more information about the app, contact Ben Gotow.
