

ImageFramer 2.2 for Mac OS X improves usability and adds 30 more frames

Published on 12/05/08

Apparent Software is proud to announce ImageFramer 2.2, their custom image framing utility for Mac OS X. With a focus on ease-of-use, ImageFramer can apply photo-realistic frames to digital images, drawings or any original artwork. Users can add frames, watermarks, batch process several images at a time, as well as colorize or adjust Hue, Saturation and Brightness of the frames for maximum flexibility. Version 2.2 adds 30 more frames and usability enhancements.

Ashdod, Israel - Apparent Software announces ImageFramer 2.2, their custom image framing utility for Mac OS X. With a focus on ease-of-use, ImageFramer can apply photo-realistic frames to digital images, drawings or any original artwork. Users can add single frames (with multiple mats), watermarks, batch process several images at a time, as well as colorize or adjust Hue, Saturation and Brightness of the frames for maximum flexibility.

ImageFramer 2.2 adds 30 more frame designs, usability changes, such as direct frame and mat width change on the preview and EXIF orientation tag support. ImageFramer 2.2 is a free upgrade for all customers.

Language support:
English, and Japanese

Minimum Requirements:

- * Mac OS X Version 10.4 or later
- * Universal Binary for PowerPC and Intel
- * 30 MB Hard Drive space
- * Core Image

Pricing and Availability:

ImageFramer 2.2 can be purchased for \$39.00 USD (per single computer license). A Family option is available for only \$49.00 (USD). A full-featured, trial version can be downloaded. This version 2.2 release is a free and recommended update for all existing customers.
