

Tembo 1.7: Easy and effective file search

Published on 01/05/12

Houdah Software today announces Tembo 1.7, an update to their powerful front-end to the Spotlight engine for Mac OS X. With its easy-to-use interface, Tembo's signature features are the context sensitive filters to narrow down search results. It finds files, folders, mail messages, images, bookmarks and more. Tembo groups search results by file type categories. For each group the top 10 matches are displayed. Version 1.7 offers a new dedicated group for Evernote notes, enhancements and more.

Luxembourg - Houdah Software today is proud to announce the immediate availability of Tembo 1.7 for Mac OS X. This free update adds a dedicated group for your Evernote notes. It is a recommended update for all Tembo users on Mac OS X Snow Leopard and Lion. Tembo 1.7 is available in English, German, French and Japanese language versions.

Tembo is a desktop search tool based upon the powerful Spotlight engine. Tembo's strength is its easy to use interface. Its signature features are the context sensitive filters to narrow down search results. In first pass, Tembo groups search results by file type categories. For each group the top 10 matches are displayed. Preferences allow for groups to be enabled, disabled and reordered.

The real power and convenience of Tembo is revealed on drill-down into a group. Here Tembo may list up to 2500 search results. Alongside the results are context sensitive filters. These make it easy to narrow down the list of results.

Each result category has its own dedicated filters:

- * Bookmarks: Type, URL Domain
- * Documents: File Type
- * Fonts: File Type
- * Images: Resolution, File Type
- * Messages: Subject, From, To
- * Movies: File Type, Codec
- * Music: Artist, File Type
- * PDF Documents: Author
- * Source Code: File Type

Enhancements brought by Tembo 1.7 include:

- * Dedicated group for Evernote notes
- * Fixes the filter feature for bookmarks
- * Addresses several minor bugs

System Requirements:

- * Mac OS X Version 10.6.6 or higher (Including Mac OS X Lion)
- * Spotlight indexing enabled

Pricing and Availability:

Tembo 1.7 is priced at USD \$15 + tax (or local equivalent) and available from the Mac App Store as well as from Houdah Software online. A demo version is available.
