

## Howling Moon Software releases ScribBall 1.1 for iPhone and iPod Touch

Published on 12/09/08

Minnesota based Howling Moon Software has released ScribBall 1.1, an update to their arcade game for iPhone and iPod Touch. Utilizing simple touch controls with realistic physics, ScribBall is an addictive, yet easy-to-learn arcade/puzzle game. By leveraging the iPhone's unique abilities and interface, ScribBall makes full use of the tilt feature. As gamers move their iPhone from side to side, the balls will tumble and roll naturally as they fall. Version 1.1 offers many new improvements.

Shoreview, Minnesota - Howling Moon Software has released ScribBall 1.1, an update to their arcade game for iPhone and iPod Touch. Utilizing simple touch controls with realistic physics, ScribBall is an addictive, yet easy-to-learn tumbling ball arcade/puzzle game. By leveraging the iPhone's unique abilities and interface, ScribBall makes full use of the tilt feature. As gamers move their iPhone from side to side, the balls will tumble and roll naturally as they fall.

ScribBall is the iPhone adaptation of the Mac version. Driven by a simple point-and-click interface, ScribBall is easy to learn. When a group of four colored balls touch, they will pop and an avalanche of new balls will tumble in to take their place. Quickly and strategically tap out a few balls to set up the next match even before they settle into place. If gamers are swift enough, they'll add to an ever growing combo.

Version 1.1 sports many new improvements and polish throughout. ScribBall now pauses and can be resumed when users receive a call. And by improving upon efficiency, the new version leaves room for more special effects; there are now three times as many particles. ScribBall boasts a variety of special effect balls, such as the explosion ball, the wildcard ball, and the locked ball. These added elements were the most requested feature and have added a new level of game play.

Highlights include:

- \* New special balls featuring explosions, wildcards, locked balls, and more
- \* Realistic physics - balls tumble and roll as they fall
- \* Easy to pick up addictive gameplay
- \* Change the direction the balls fall by tilting the iPhone
- \* Fun hand-drawn graphics

"This latest release adds variety and depth to the game," cites Andy Korth, co-founder of Howling Moon. "A lot of people missed the powerup balls from the Mac version, and I'm glad we've got them on the iPhone now. We've addressed the number one customer request by bringing in the special balls, and I'm sure everyone will love it."

Supported Languages:

- \* US English

System Requirements:

- \* iPhone, iPhone 3G or iPod Touch 2.1 or later

Pricing and Availability:

To commemorate this update, for a limited time ScribBall 1.1 will be on sale for 99 cents (normally priced at \$3.99 USD) and available exclusively through Apple's App Store.
