

Arten Science Releases DataClean: Cross Platform Data Clean Utility

Published on 12/11/08

Arten Science is proud to announce DataClean 1.0.0. DataClean is a Cross Platform Utility designed to make it straightforward to clean large amounts of data. Data can be imported from a CSV or TAB delimited file, modified and then saved back in several different formats including native Excel, TAB Delimited and Comma Separated. You can also save the modified file using your own Custom Delimiter.

Derbyshire, UK - Arten Science is proud to announce the first release of DataClean. DataClean is a Cross Platform Utility designed to make it straightforward to 'clean' large amounts of data. Data can be imported from a CSV or TAB delimited file, modified (any column, any row) and then saved back in several different formats including native Excel (XLS), TAB Delimited and Comma Separated. You can also save the modified file using your own Custom Delimiter.

DataClean supports the following Actions: Remove / Replace / Find / Insert and Format. Within each Action DataClean provides Tasks that you can apply to the data grid.

Tasks include:

- * Remove Leading Spaces
- * Remove Trailing Spaces
- * Remove Leading and Trailing Spaces
- * Remove Text
- * Remove Selected Row(s)
- * Remove Text from Start of Column
- * Remove Text from End of Column
- * Remove Text Before ...
- * Remove Text After ...
- * Replace Text
- * Find Text
- * Insert at the Beginning of the Column
- * Insert at the End of the Column
- * Insert Blank Row
- * Format as Uppercase
- * Format as Lowercase
- * Format as Capitalised

DataClean was written because there are not any tools available to do this job in a simple and intuitive manner. Hours spent trying to make your spreadsheet software perform in a way it was never designed, or creating and testing scripts - there is no longer any need. Anybody working with large amounts of structured data, needs DataClean.

DataClean features a clear and uncluttered interface which takes on the native appearance of the platform on which you are running. A license for DataClean works across all platforms and you are allowed to install two copies of DataClean from a single license. An unlimited corporate 'Site License' is also available.

Features:

- * Cross Platform, Mac OSX, Windows XP and Vista, Linux
- * Supports Huge Data Grids
- * Opens Comma Separated and Tab Delimited Files
- * Saved XLS, CSV, TAB and Custom Delimiter
- * Lightweight - No Installation Necessary
- * Extremely Simple to Use
