

Bit Of Paradise Products releases SonicMood 4.8.9 for Mac OS X

Published on 12/15/08

California based Bit Of Paradise Products today announced SonicMood 4.8.9, their popular ambient music generation utility for Mac OS X. Perfect for mediation, or simply blocking out annoying background noises, SonicMood combines soothing nature sound files with user-created ambient music. Users may easily mix and produce their own royalty-free ambient music sound tracks for film, movies, websites and videos. Version 4.8.9 sports many new improvements, and is a free and recommended update.

Paradise, California - Bit Of Paradise Products today announced SonicMood 4.8.9, their popular ambient music generation utility for Mac OS X. Perfect for mediation, or simply blocking out annoying background noises, SonicMood combines soothing nature sound files with user-created ambient music. It serves as a multifaceted ambient music generator and player for New Age, meditation, yoga, or to simply help relieve normal stress of the day.

Each of the 28 available Moods can be completely altered and edited, offering two separate types of sound generation. One being the MIDI player and the other being the Soundfiles that come with the application. Each of the 28 Moods offers three separate MIDI instruments and three separate Soundfiles, facilitating an endless combination of polyphonic sounds to sooth the soul. At any time, more instruments and Soundfiles may be added to any Mood, and users can even create their own new Moods, as well as add their own Soundfiles.

Users may easily mix and produce their own royalty-free ambient music sound tracks for film, movies, websites and videos. Among only one of SonicMood's most prolific features is its ability to play music tracks automatically without repeating itself. SonicMood will forever randomly play a Mood until stopped. This makes the application particularly suited for those that need a continuous, ever-changing source of New Age, ambient music.

"According to researchers at the American Society of Hypertension's Twenty Third Annual Scientific Meeting and Exposition (ASH 2008), listening to just 30 minutes of rhythmically homogeneous music every day may significantly reduce high blood pressure." cites Robert Mitton, Director of Marketing for SonicMood. "Patients with mild hypertension who listened to just half an hour of classical, Celtic or raga music a day for four weeks experienced significant reductions in 24-hour ambulatory blood pressure (ABP)."

Version 4.8.9 sports many new improvements, and is a free and recommended update. The edit window is now more compact to save screen space. In addition, the edit window is now resizable with vertical and horizontal scrollbars so the controls can be scrolled. The width and height of the edit window, along with the position of the scrollbars, is saved. Changed default starting size and position of windows. Made changes to the default locations of windows so they open over the main window. Visit SonicMood online for a complete list of changes.

Feature Highlights:

- * Automatically plays polyphonic sounds with stimulating harmonies
- * 28 pre-defined Moods
- * Create soundtracks for film/movies/websites with no copyright issues
- * Moods are completely customizable
- * Create Moods and export them to share with others
- * 128 instruments MIDI keyboard available on demand
- * Optimized for Leopard with iTunes-like operation

SonicMood is the perfect example of rhythmically homogeneous music. Unlike the other forms

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

of music listed elsewhere, SonicMood features constantly changing, non-repeating, rhythmically homogeneous music, which makes it a wonderful choice for medicinal music.

Minimum Requirements:
