Lenexa, KS - BKeeney Software Inc. announces the availability of an update of their file management tool, File Sheriff. Version 1.3 changes all branding and registration codes from Koingo Software to BKeeney Software. All users need to obtain new registration codes. Existing licensed users can request a coupon code to get File Sheriff for free by sending an email to support with their existing File Sheriff registration code.

File Sheriff allows you to easily generate icon previews, rename your MP3 files based on their ID3 tags, batch-apply file attributes, edit hidden file options, and more! File Sheriff gives you full control over some of the advanced features like the bundle bit, custom icon setting, visibility, and more!

Manage the thousands of MP3s on your hard drive. File Sheriff can automatically rename MP3s based on their ID3 tags (which shows in iTunes). No longer do you have dysfunctional file names!

One of the most powerful features File Sheriff offers is its Batch module. Batch operations allow you to choose a folder and apply a set of attributes to all files and/or folders within it. A powerful Find and Replace feature finds files or folders with specific attributes and allows you to change them.

The File Sheriff Icon Creator takes the contents of your picture, movie, text file, or other compatible media, and automatically creates Mac OS X Finder icons for them. Now you don't have to wait for the Finder to generate a preview for you.

### System Requirements:

File Sheriff is compatible with Mac OS X 10.4 and later.

### Pricing and Availability:

New users can purchase File Sheriff for \$9.95 (USD). A free 14-day trial can be downloaded from BKeeney Software's website.
