

FourTrack iPhone App Updated to Version 1.2 with Import into RiffWorks

Published on 12/17/08

Sonoma Wire Works' FourTrack multitrack audio recorder for the iPhone has been updated to v1.2. Syncing FourTrack songs from iPhone to computer is now easier with direct import into RiffWorks. FourTrack users can now import tracks, complete with pan and gain settings, directly into RiffWorks recording software for Mac and Windows. Songs can be instantly posted from RiffWorks to the RiffWorld community for comments, online collaboration, and contests.

Los Altos, CA - Sonoma Wire Works' FourTrack multitrack audio recorder for the iPhone has been updated to v1.2. FourTrack users can now import tracks, complete with pan and gain settings, directly into RiffWorks recording software for Mac and Windows. Songs can be instantly posted from RiffWorks to the RiffWorld community for comments, online collaboration, and contests. More tracks, effects, and drums can be added to songs using RiffWorks. All tracks can be exported as .wav files for use in any DAW.

FourTrack v1.2 iPhone App Improvements Include:

- * FourTrack WiFi Sync to RiffWorks - RiffWorks Standard and RiffWorks T4 v2.5 automatically detect and import tracks directly from the FourTrack iPhone app, including pan and gain settings, using Bonjour on Mac and Windows.
- * Improved Master Output Compressor/Limiter - All new program-dependent master output compressor/limiter increases overall output level and eliminates pumping and breathing at high output levels.
- * Disabled sleep during playback - Improves usability.
- * Reduced battery usage - Saves battery when phone goes to sleep with FourTrack running.

About FourTrack

The FourTrack multitrack audio recorder for the iPhone is a songwriting and practice tool for singers, guitar players, piano players and other musicians who want to capture musical ideas and record songs on their iPhone. Plug in a microphone, arm a track, record, and repeat. FourTrack works with the iPhone built-in microphone or a headset mic. WiFi sync allows FourTrack recordings to be downloaded to any desktop computer running RiffWorks or with any browser. Tracks can then be loaded into any recording software (DAW) to continue working on songs. FourTrack is developed by Sonoma Wire Works, makers of RiffWorks guitar recording software, and by Retronyms, makers of Recorder, the top selling voice recorder for the iPhone. Introductory price: \$9.99 (USD).

About RiffWorks

RiffWorks easy-to-use guitar recording software includes automatic track creation, loop recording, guitar-oriented effects, InstantDrummer, professionally recorded drum tracks, online music collaboration, and song posting to RiffWorld. FourTrack imports into RiffWorks T4 (free edition) and RiffWorks Standard (\$129).

About The Retronyms

The Retronyms, headquartered in San Francisco's sunny Mission district, is a band of programmers and artists developing entertaining self-expression tools for PC, Mac and the iPhone. The Retronyms focus on creating fun-to-use products with a streamlined workflow, and providing excellent customer service. Current products include Snap, a web cam photo-booth, and Recorder, the top-selling voice recorder for the iPhone.
