

New Endocrinology App provides critical information at the point of care

Published on 02/06/12

This new app provides the critical information needed right now for the care of acute endocrine problems. The "Endocrinology and Endo Emergency" mobile application was created by the world-renowned endocrinologists who published endotext.org and thyroidmanager.org - the most comprehensive and up-to-date online endocrine textbooks. The app is designed for physicians, nurses, emergency room caregivers, hospitalists, trainees, students, and any caregiver who needs to treat seriously ill patients.

South Dartmouth, Massachusetts - The Editors of [Endotext](http://endotext.org) and [Thyroidmanager](http://thyroidmanager.org) announce the release of their new medical app, "Endocrinology and Endo Emergency".

The app provides concise, practical information on endocrine emergencies, and provides the answers needed RIGHT NOW for their care. Each of the 36 topics covered includes the clinical recognition, pathophysiology, diagnosis, differential, treatment, and follow up. In addition, references to available Clinical Guidelines, and important literature citations are provided.

Focusing on the critical information needed at the point of care, the app includes topics such as Cushing's disease, diabetic ketoacidosis, managing acute type I and type II diabetes, hypercholesterolemia, adrenal insufficiency, hyperthyroidism, thyroid storm, and much more. Key facts are presented in tables and flow-charts to allow quick reference to crucial information.

The app is designed for physicians, nurses, emergency room caregivers, hospitalists, trainees, students, and any caregiver who needs to treat seriously ill patients.

The "Endocrinology and Endo Emergency" mobile application was created by the world-renowned endocrinologists who also brought you ENDOTEXT.ORG and THYROIDMANAGER.ORG, the most comprehensive and up-to-date web-based endocrine textbooks. Endocrinology and Endo Emergency is always updated with the latest information, and updates can be automatically downloaded by users.

To view or purchase the app in the Apple App store (also available for android) or go to endoemergencies.org website for information and to view a sample section. Qualified reviewers may contact us for promo codes.
