

Huge Apple TV giveaway announced alongside Speed Download 4.1.11

Published on 05/10/07

Speed download, squarely aimed at all Mac OS X users, has been met with glowing praise from reviewers, web authors, developers, beta testers and the more than six million users who have left behind nuisances such the inability to reliably download files from the internet, the inability to easily resume file transfers when the internet connection fails, and more. This new update continues to enhance and tweak the performance of Speed Download to ensure utmost reliability.

FOR IMMEDIATE RELEASE

Yazsoft is proud to announce that from today, May 09 up until May 31, 2007, we will be hosting a big Apple TV giveaway. no purchase necessary! Simply email us at info@yazsoft.com with the subject line 'An Apple TV for ME!'.

Note: Everyone that registers during this period received three entries per license purchased as a modest token of thanks from the SD team.

At the same time, a new release of Speed Download, 4.1.11, is now available.

Version 4.1.11 adds some key improvements and is a recommended update for all Speed Download 4 users.

- New Simplified and Traditional Chinese localization.
- Addresses internal fixes and tweaks as reported by some users.
- Build flagged for Apple TV giveaway. From May 09 until May 31, 2007, you can win a hot new Apple TV. Visit our website for details.

BONUS

As an added bonus, Speed Download now includes a link to Transmission; an incredibly well designed Bittorrent application. Transmission is a free, lightweight BitTorrent client featuring a simple, intuitive interface on top of an efficient, cross-platform back-end.

HIGH DEFINITION VIDEO SCREENCAST

See Speed Download in action and learn more about all the cool, new features it offers via our high definition video screencast. As well, take advantage of a 2 for 1 promo.
