

Ohanaware release Fun Greetings 1.1 for Mac OS X - Photo Greeting Cards

Published on 02/08/12

Ohanaware today announces Fun Greetings 1.1, an update to their user-friendly Photo Greetings Card printing product for the Macintosh. Fun Greetings is a card printing program, where a users photos are the star. With the emphasis on family, kids, pets and any other photos, Fun Greetings enables the user to print their own Photo Greetings Cards right at home on their Mac and printer. Version 1.1 includes a new e-card option, making it easy to send greetings cards through e-mail.

Jhangle Village, Taiwan - Ohanaware, a family team specializing in intuitive photo editing software, are proud to announce the immediate release of their latest product update "Fun Greetings 1.1". Fun Greetings is a user friendly Photo Greetings Card printing and e-card product for the Macintosh.

Fun Greetings is a card printing program, where a users photos are the star. These kind of cards are often referred to as Photo Greetings Cards, and unlike store bought cards, the emphasis of these Photo Greetings Cards is photos of a users family, kids, pets and other photos they may have taken. Fun Greetings enables the user to print their own Photo Greetings Cards right at home on their Mac and printer.

Fun Greetings interface has been designed to keep the process of creating a Photo Greetings Card as simple as possible. It can be as simple as 3 steps, Step 1, choose a 1-Click Style. Step 2, choose a photo and Step 3, Print the card. While Fun Greetings was designed to be easy to use, Ohanaware have also included a getting started guide, printing tips and other help documents.

Fun Greetings' printing engine can compensate for printer margins (so there isn't a huge gap down one side of the card), and it can print to a variety of card sizes. The print engine even includes a custom card size option, allowing for other card sizes to be specified. The print engine, also contains a unique feature, whereby the user can enter the dimensions of a envelope, and Fun Greetings will calculate the optimum card size.

Version 1.1 of Fun Greetings included the new e-card option, making it easy to send greetings cards through e-mail.

What's new in Version 1.1:

- * Fun Greetings 1.1 includes new Valentine's Day card 1-Click Styles, a handful of Birthday 1-Click Styles
- * A new e-card function has been included, making it easier for customers to send their cards via e-mail
- * Two new photo effects are included in this update, bringing the total to 11 built-in photo effects
- * The Export process has been improved, based upon customer feedback. The Print Window has also been improved

System Requirements:

Fun Greetings requires a Intel based Macintosh computer, running Mac OS X v 10.5 or later. It is recommended to have at least 1 gb of RAM.
