

Agile Web Solutions releases 1Password 2.9.6

Published on 12/22/08

Agile Web Solutions today announced the release of 1Password 2.9.6, a maintenance release that provides several improvements and bug fixes. 1Password is a highly secure database to keep track of logins, secure notes, identities, credit cards, bank accounts, and software registration information. This update is recommended for all users and is a free upgrade for all paid 1Password customers.

Toronto (Ontario, Canada) - Agile Web Solutions today announced the release of 1Password 2.9.6, a maintenance release that provides several improvements and bug fixes. This update is recommended for all users and is a free upgrade for all paid 1Password customers.

What is 1Password?

- * The most popular password manager for Mac OS X and iPhone (according to MacUpdate, VersionTracker and iUseThis ratings)
- * Provides the ability to sync your Mac passwords with your iPhone/iPod touch
- * A Macworld magazine "Mac Gem", rated 4.5/5 stars and nominated for a Macworld Readers' Choice Award
- * The only password manager with integrated anti-phishing technology
- * An automatic form filler with support for credit cards and multiple identities
- * A highly secure database to keep track of logins, secure notes, identities, credit cards, bank accounts, and software registration information

The following is a detailed changelog that identifies all the changes and improvements made in this release:

- * [CHANGED] Changed the format of the automatically generated Autosave Login name to not include the username
- * [CHANGED] 1Password will no longer crash on startup if the Agile Keychain is not valid
- * [FIXED] Fixed a crash that would occur when the main 1Password window was closed and the keychain was updated by the browser
- * [FIXED] Fixed problem with iPhone sync when current time on iPhone was different from time on Mac
- * [FIXED] Fixed bug in Password Wallet importer for notes with new line characters
- * [FIXED] Resolved issue where some saved logins would not appear in the Fill Login menu
- * [FIXED] Fixed issue that prevented 1Password application from starting on G3 processors
- * [FIXED] Fixed memory leaks in browser extensions

System Requirements:

- * Mac OS X 10.4 (Tiger) or 10.5 (Leopard).

Pricing and Availability:

A Single User license is available for \$39.95 (USD) and a five user Family License for \$59.95 (USD). A fully functional 30-day trial version is available, along with a free version limited to 20 items. Special media licenses are available for members of the press and the blogging community upon request.
