

Train Titans brings puzzle solving, train track building action to iOS

Published on 02/17/12

Ontario based Sad Cat Software today announced the release of Train Titans for the iPhone, iPad, and iPod touch. This unique puzzle game challenges users to create working railroad tracks that get multiple trains to and from various cities without crashing, and guide those trains to make sure they make the right turns along the way too! As gamers progress the challenges increase, and players are liable to run into more trains to deal with, as well as diverse level terrains to build around.

Ontario, Canada - Sad Cat Software, a burgeoning mobile application and game developer, is excited to announce the launch of Train Titans for the iPhone, iPad, and iPod touch. An exciting new puzzle adventure, Train Titans challenges you to create working railroad tracks that get multiple trains to and from various cities without crashing. But your job isn't done once tracks are built! Players have to guide every train to make sure it follows the right path, makes the right turns, and avoids trouble! The further you progress, the more complex the logistics become, and the more challenging the terrain features get. Get ready, because you'll be building whole train-ready cities complete with buildings and more! Offering addicting puzzle action that's as engaging as it's graphics, Train Titans is currently available for download in the Apple App Store for \$0.99 in the Puzzle Games category.

Train Titans blends problem solving puzzle action with many of the real-time gameplay features of sim experiences! Players start each level with only beginning and end stations for the trains they need to move, and its up to them to use the various track segments, tools, and space at their disposal to make railway systems that connect everything together. The fun doesn't stop once the building does though. Players need to man the track, switching turns on and off, and more to navigate every train safely - no collisions allowed or its game over! Train Titans includes 28 diverse and sequentially more challenging levels spread across six equally unique terrain themes ranging from winter forests, prairies, deserts and more! Best of all, as players continue to play their work will help them build up whole interactive cities which includes 34 different in-game buildings.

A highly polished mobile gaming experience to say the least, Train Titans includes 3 difficulty options for players to choose, as well as local and global high score leaderboards to give gamers the chance to compete against themselves as well as the world at large! Meanwhile, convenient auto-save options ensures that none of your hard fought work ever goes to waste if you have to ext the game in a hurry. The app also features full retina display support and a free form free-play mode with randomly generated maps too. Simply put you're guaranteed to always find something new and interesting regardless of how long you play. Get a hold of your inner train geek, it's time to get your conductor hat on and go full speed ahead for some white knuckle puzzle action with Train Titans for iOS!
