

Macvide iPod Converter 2.1: Video mp4 Conversion is Easy

Published on 12/23/08

Macvide is proud to announce iPod Converter 2.1, their video to iPod mp4 conversion utility for Mac OS X. Developed specifically for Mac users, iPod Converter allows conversion of video files to mp4 iPod video. All of the most popular formats are supported, and helps bridge the gap between many video standards. iPod Converter offers an easy-to-use interface that guides the user through the conversion process.

Los Angeles, USA - MacVide is proud to announce iPod Converter 2.1, their video to mp4 conversion utility for Mac OS X. With a focus on ease-of-use, iPod Converter allows conversion of the most popular video files to mp4 iPod video. It fully integrates the process into the Mac experience by allowing human interaction on the content during conversion.

All of the most popular formats are supported, including MOV, 3GP, MPEG, AVI and helps bridge the gap between many video standards. iPod Converter is a great tool for using with Apple's iTunes.

MacVide iPod Converter provides powerful functions to set different settings for your video files. It allows you to select crop video area, the bit rate, frame rate, video resolution. Video preview with "rangebar" allows you to choose the exact video footage you want, anywhere between the first and last frames. With MacVide iPod Converter you will be able to convert your entire movie to .MP4 and watch it anywhere and anytime. It's very easy to use and it supports most portable MP4 devices.

New in version 2.1:

- * Enhanced support for AppleScript and Automator actions.

Feature highlights include:

- * Input format supported: all popular Video formats including AVI, WMV, MOV, MPG, ASF, DivX, etc.
- * Playback on multiple players including iPod, iPhone, PSP and Apple TV, Creative Zen, Archos, etc.
- * Crop your video area to remove the black video sides.
- * Powerful video/audio output settings
- * Allows to set video resolution and frame rate
- * Allows to set video and audio bitrate.
- * Customizable dimensions for exported video
- * Auto Determination of Movie length
- * Enhanced support for AppleScript and Automator actions.
- * User can control Movie over Capturing

Minimum Requirements:
