

Codewave MyTunesRSS 4.2.2 - Your Personal Media Server

Published on 03/19/12

Codewave Software today announces MyTunesRSS 4.2.2. MyTunesRSS is your personal media server. Access your music, movies, TV shows and photos with a simple browser or the free iPhone and iPad app from all over the world. Smart playlists get updated automatically whenever new matching titles are added to or removed from your library. Instead of uploading your media to a cloud service you simply keep it at home at no additional cost.

Rastatt, Germany - Codewave Software today is pleased to announce the release of MyTunesRSS 4.2.2. MyTunesRSS is your personal media server. Access your music, movies, TV shows and photos with a simple browser or the free iPhone and iPad app from all over the world. Instead of uploading your media to a cloud service you simply keep it at home at no additional cost.

MyTunesRSS offers countless great features. To name just a few, the user management allows you to create multiple accounts for your friends or family with individual permissions for each user. You can for example restrict accounts for your children to suitable movies only. Smart playlists get updated automatically whenever new matching titles are added to or removed from your library. You can import your media directly from the file system or from your existing iTunes, iPhoto and Aperture library. Easily share your favorite media on Facebook, Twitter and the LastFM community. Download playlists for playback in most media players like Windows Media Player, iTunes or WinAmp. Play music and movies right inside your browser.

The software is written in pure Java which means that it runs on Windows, Mac OS X and Linux. With the administration being browser based you can also run it on servers without any attached display.

Pricing and Availability:

There is a 30-day trial version available for download and you can purchase a MyTunesRSS license for only 15 EUR.
