This amazing saving is only available at the MacZOT website for one day only. The promotion will start on Tuesday 8th January 2009 at 00:00AM and will end 24 hours later.

Corby, United Kingdom - The Dream Apps is proud to present an exclusive one day promotion of the award winning video recording application Dream Capture at 40% off. This amazing saving is only available at the MacZOT website for one day only. The promotion will start on Tuesday 8th January 2009 at 00:00AM and will end 24 hours later.

Dream Capture is a simple and intuitive utility to record videos that are perfect for uploading to various video sharing websites, importing into iMovie or GarageBand for the creation of Podcasts or burned to DVD. This makes Dream Capture a great compliment to Apple's iLife Suite.

Dream Capture supports most cameras on the market, but is optimized for Apple's built-in and external iSight cameras. The application captures sharp, bright and beautiful video that is encoded in the H.264 codec. Dream Capture features an automatic image stabilizing platform using the same incredible technology as Apple's Shake. All this, combined in a sleek, stylish and easy-to-use interface that makes video recording a Dream.

Dream Capture also has many advanced features such as automatic camera shake reduction and background noise reduction when recording audio or video in crowded areas!

Pricing and Availability:

Dream Capture is available for one day only on the 8th of January at \$5.97 USD (40% off the retail price of \$9.95 USD).
