

Budget Workbook Updates to Version 1.3

Published on 05/15/07

Snowmint Creative Solutions LLC has updated Budget Workbook to version 1.3. Budget Workbook allows users to quickly enter their expense transactions, then view several different reports based on category and time. View reports that show your expenses over time, by category, or against your expense limits. Version 1.3 also introduces Transaction Sets; allowing a completely different set of transactions for different needs. Track expenses to see where you're spending your money.

Snowmint Creative Solutions LLC has updated Budget Workbook to version 1.3. Budget Workbook allows you to quickly enter expense transactions, and then view several different reports based on expenses over time, by category, or against your expense limits.

Version 1.3 also sports "Transaction Sets". This new feature allows the user to have a completely different set of transactions for different requirements. For example, you could have one set for home expenses and another set for tracking those reimbursements from work.

Budget Workbook is simplicity itself:

The first step in getting any information about your financial situation is to know what you are spending and what you are spending it on. Enter the transaction information, date, amount, who it was to, and the category it applies to. Budget Workbook then displays the results of all the transactions entered in many convenient ways: as a table sorted by any of the fields, as an amount summary, and in reports.

Major Features in Version 1.3

- * Simple Transaction Entry: Just enter some basic information and click Record.
- * Predefined Categories: Use one of the 75 categories or create your own.
- * Multiple Transaction Sets
- * View reports: See where you are spending your money.
- * Compatible with Mac OS X 10.2 through 10.4.
- * Expense Patterns may be loaded directly into Snowmint Creative Solutions companion program, Budget.
- * Universal Binary: Works great on both Intel and PowerPC computers running Mac OS X.

System Requirements:

- * Requires Mac OS X v10.2 or later.
- * 5 MB Hard Drive Space

Lifetime Free Upgrade Policy:

Snowmint Creative Solutions LLC assumes 100% responsibility for your satisfaction. Once you buy one of our products, you won't have to pay for upgrades to the software again. When a new version of our software is made available, you may download the new version anytime. We are constantly improving our software by adding new features and fixing bugs. And you shouldn't have to pay again for those improvements.

Budget Workbook 1.3 can be downloaded and demo'd for 40 launches or for 20 days, whichever comes first. The demo period expires at that time. Academic and volume licensing available upon request.
