

Numerology iOS App Updated for new iPad's Retina Display

Published on 03/28/12

infiniteNIL today releases Numerology 1.9.7, an update to the iOS app that supports the new iPad's Retina display. Numerology helps you use the ancient science of numerology to gain insight into what makes people tick. See how compatible people are for friendships, business relationships, or romance. It's a great icebreaker for parties as well. A free version, Numerology Lite, is also available and is limited to 2 profiles.

Salt Lake City, Utah - infiniteNIL today is pleased to announce that Numerology 1.9.7, a universal iOS app, is now available in the iTunes app store. This update adds larger images and icons to support the new iPad's Retina display and profile images are much sharper.

Numerology is an application that helps you use the ancient science of numerology (similar to astrology) to gain insight into yourself and other people. By studying the numbers derived from a person's name and birth date it is possible to determine their inner personality, talents, hidden tendencies, turning points, and probable challenges in life, among other characteristics.

You can also use it to see how compatible two people are for friendship, a business relationship, or romance. Forecasts for the year, month, and day are also provided. You can change the forecast date to see your forecast for any date you want. It's a great icebreaker at a parties as well if you enter all the party goers' profiles and share and discuss them.

"Numerology displays a lot of text to read and the new iPad Retina display makes that text look much better and easier to read", says Rod Schmidt of infiniteNIL Software.

Feature Highlights:

- * Use the science of numerology (Pythagorean) to gain insight into yourself and others
- * Numerologists: easily manage your client list and calculate a client's numbers
- * Entertain at parties help guests get to know each other
- * See who's compatible for friendship, business partnerships, or romance
- * See what the upcoming day, month, and year have in store for you
- * Share insights with others by emailing reports and posting reports to your Facebook wall
- * Quickly import names, birthdates, and pictures from the Contacts application and Facebook
