

## Introducing xTime Project 4.2 for Mac OS X

Published on 05/19/07

app4mac has released xTime Project 4.2. It has never been so easy to manage a project. xTime Project is designed to keep track of how much time you spend on a project. It also figures out the cost of the project. xTime Project helps you organize, administer and monitor your tasks so you can spend more time managing your projects and less time learning to use your project management application.

xTime Project is designed to keep track of how much time you spend on a project. It also figures out the cost of the project.

xTime Project has always provided the support you need for professional project management. Our latest version is more powerful without sacrificing the simple and intuitive interface that helped make xTime Project such a success. Whether your job calls for managing large construction projects, sophisticated media activities or detailed time schedules, xTime Project adapts to your needs.

xTime Project helps you organize, administer and monitor your tasks so you can spend more time managing your projects and less time learning to use your project management application.

Along with our seamless integration with MS Project, you will be successfully managing even the most complex projects in a fraction of the time it takes to do it with other products. xTime Project delivers stunning graphics that are sure to make an impact with clients and colleagues.

Scheduling and managing projects transcends industries and professions—it's essential for successfully achieving project goals and objectives. xTime Project simplifies project scheduling in an easy-to-learn, cost-effective tool, ideal for experienced project managers as well as the occasional project manager.

What's new ?
