

Mireth Technology announces maintenance release of NetShred X

Published on 04/07/12

Mireth Technology Corp. announced a new release of NetShred X, its internet eraser software for Mac OS X. Version 4.7.4 adds support for Firefox 11, Camino 2.1 and Chrome 17. NetShred X is easy to use internet eraser software for Mac OS X that erases files web browsers and email programs leave behind. And like all Mireth Technology products, it was designed to be easy to use. This is a cleaner solution than just deleting the files, because it ensures that the data can't be recovered.

Richmond, Canada - Mireth Technology Corp. has released version 4.7.4 of NetShred X, its easy to use internet eraser that erases internet cache, history and mail. NetShred X runs on Mac OS X. Version 4.7.4 adds support for Firefox 11, Camino 2.1 and Chrome 17.

NetShred X is easy to use internet eraser software for Mac OS X that erases files web browsers and email programs leave behind. And like all Mireth Technology products, it was designed to be easy to use. Because internet privacy software can't be effective if it's not used, NetShred X was designed to run automatically, without user intervention. And since erasing temporary internet files can take some time, NetShred X was designed to run in the background, so using the software doesn't interfere with the user's web browsing. Most importantly, NetShred X is an effective method of permanently deleting internet tracks. This is a cleaner solution than just deleting the files, because it ensures that the data can't be recovered.

Pricing and Availability:

NetShred X is available for immediate download, or on CD-ROM, starting at \$24.95. Registered users of NetShred version 4 can take advantage of this free update. NetShred version 3 users can take advantage of an upgrade discount. Educational pricing and volume discounts are available. NetShred X runs on Mac OS X.
