

## Macvide 3gp Converter 2.1 for Mac OS X

Published on 01/20/09

MacVide has announced MacVide 3gp Converter 2.1, their mobile video conversion utility for Mac OS X. Developed specifically for Mac users, 3gp Converter allows video conversion to mp3 mobile video. All of the most popular formats are supported, and helps bridge the gap between many video standards. MacVide 3gp Converter offers an easy-to-use interface that guides the user through the conversion process.

Los Angeles, USA - MacVide has announced MacVide 3gp Converter 2.1, their mobile video conversion utility for Mac OS X. With a focus on ease-of-use, MacVide 3gp Converter allows conversion of the most popular video files to 3gp mobile video. It fully integrates the process into the Mac experience by allowing human interaction on the content during conversion.

All of the most popular formats are supported, including MOV, 3GP, MPEG, AVI and helps bridge the gap between many video standards. MacVide 3gp Converter is a great tool for using with cellulators and phones.

MacVide 3gp Converter provides powerful functions to set different settings for your video files. It allows you to select crop video area, the bit rate, frame rate, video resolution. Video preview with "rangebar" allows you to choose the exact video footage you want, anywhere between the first and last frames. With MacVide 3gp Converter you will be able to convert your entire movie to .3gp or .3g2 and watch it anywhere and anytime. It's very easy to use and it supports most mobile and cellular devices.

New in version 2.1:

- \* Enhanced support for AppleScript and Automator actions.

Feature highlights include:

- \* Convert MOV, AVI, WMV, MPEG video to 3gp
- \* Time line with ZOOM feature
- \* Crop video area to remove the black video sides
- \* Easy to use interface

Minimum Requirements:

- \* Mac OS X Version 10.4 Tiger or 10.5 Leopard
- \* Universal Binary for PowerPC and Intel
- \* 11.2 MB Hard Drive space
