

MagicFrogPad 2Plus Released: Using the Apple MagicTrackpad as a keyboard

Published on 04/17/12

MagicFrogPad allows for the brilliant Apple Magic Trackpad functions to be integrated to become a one handed keyboard. Since its inception, the FrogPad, inherently a one-handed keyboard interface designed to make mobile easier, is squarely focused on the mobility space. Its unique keyboard design takes less space, and requires only one handed use. Globally, FrogPad has been critically acclaimed, and is considered a most successful alternative user interface for all languages and character sets.

Houston, Texas - Type with elegance and speed on the Apple Magic Trackpad using the FrogPad MagicFrogPad software. Have a one handed keyboard and a mouse on the same device.

It can be either left handed or right handed. Downloading the software from the FrogPad web store, converts your Apple Magic Trackpad into a one handed FrogPad keyboard.

Computer-human interface guru, Linda Marroquin, CEO, related that "...The new version of MagicFrogPad is taking a successful product and making it better. There has to be a new elegance of using a computer in 2012. Elegant computers, elegant designs but Horrible keyboards makes no sense. We have evolved. Typing can be smooth and enjoyable. Type faster! And Elegance is beauty on your desk and MagicFrogPad is Elegant. The future of Multi Touch products require a user interface that allows for maximum input with fewer products.

MagicFrogPad software allows for the brilliant Apple Magic Trackpad functions to be integrated to become a one handed keyboard. "What if there was new way to interface with Mac, Tablets or any Multi Touch Surface? FrogPad is transforming the way to interact with the latest Multi Touch technologies" said FrogPad president Linda Marroquin. FrogPad's one handed user interface is easy to use, lets mobile workers be more flexible, and improves efficiencies and safety in many environments.

Since its inception, the FrogPad, inherently a one-handed keyboard interface designed to make mobile easier, is squarely focused on the mobility space. Its unique keyboard design takes less space, and requires only one handed use. Tutorials can be found on YouTube, its website and through fun games FrogPad has developed to make learning the new interface fun. Followers from around the world see the value of this new MultiTouch user interface. Globally, FrogPad has been critically acclaimed, and is considered a most successful alternative user interface for all languages and character sets.

FrogPad's one-handed, ergonomic, keypad solves the problem of accurate, fast, mobile text and data entry for a multitude of devices - the new tablets, NetBooks, smart phones, GPS devices, home automation, education and wearable computers. This new model for data entry has been proven in the market and globally is clearly the most successful alternative one handed user interface (UI). The next emerging market is the Multi Touch display market which will be empowered by the FrogPad multi touch IP.
