

AppZapp 4.1 for iOS: Free Guide to Every iOS and Mac App Store Worldwide

Published on 05/01/12

ConIT AG today announces AppZapp 4.1 for iOS, their free News app that provides encyclopedic listings, searches, filtering, activities, news, charts and specials for all 123 global iOS and Mac App Stores. Based on a specially developed algorithm, version 4.1 includes a new Community feature to share apps and news with friends. All 550,000+ listings, including price charts, screenshots, descriptions, ratings, and choice of 21 different app categories are available for viewing from within the app.

Basel, Switzerland - ConIT AG today is pleased to announce AppZapp 4.1 for iOS, a major update to their free News app that provides encyclopedic listings, searches, filtering, activities, news, charts, and specials for all 123 global iOS and Mac App Stores. Based on a specially developed algorithm, AppZapp provides the top newcomer apps, most viewed, most liked, and the Top 400. All 550,000+ listings, including price charts, screenshots, descriptions, ratings, and choice of 21 different app categories are available for viewing from within the app. Included in AppZapp 4.1 is a new Community feature, which allows app fans to share the names of the apps in their app collection with others, discuss apps, like them, or add them to their wishlist. Community also enables app syncing, creation of a free AppZapp account, and a live view of current AppZapp browsing. Users may instantly follow links to purchase and download apps from their App Store.

According to the online site AppAdvice, "But what really sets AppZapp apart from similar apps is its community and web syncing. Signing up for a free AppZapp account either through the app or dedicated website will allow you to like apps, discuss them with the community, add them to your wishlist, etc., and the changes will be reflected no matter where you access it from next." 148Apps extols the app's potential to save users considerable cash, "AppZapp promises to be the Bargain Guide for the App Store and a quick glance will confirm that for all. AppZapp keeps track of all the price drops going on at any one time then lists them in appropriately organised lists for easy consultation."

The News app includes a wide variety of user settings, allowing users to filter results by All Apps, Mac, Paid & Free, Categories, Show iPhone Apps On/Off, Show iPad Apps On/Off, and Show Mac Apps On/Off. Other functions available from the app's Menu include: News (listed chronologically), Search (enter a text search for any iOS or Mac App Store app), Live Stream (real-time list of the community's current activity), Changes (latest additions, updates, and price changes listed chronologically), Community (AppZapp user's forum), Top Lists (Top 400, new, viewed, and rated apps in 21 categories), Sales (price reductions), Now Free (paid apps now available free), New Apps (latest apps, chronologically, by category), My AppZapp (watch lists and alerts), and Categories (Educational, Books, Utilities, Developer Tools, Finance, Photography, Healthcare & Fitness, Graphics & Design, Lifestyle, Medical, Music, News, Navigation, Productivity, Reference, Travel, Social Networking, Games, Sports, Entertainment, Video, Weather, and Business).
