Leamington Spa, United Kingdom - Meet Jed, an alien that is worried about the future of The Universe, because space has been polluted with mysterious bricks. These bricks seem to have a one weakness though - when bunch of them are formed into even rectangle or square - they disintegrate, simply saying disappear. Where did those bricks come from...? Why they're in space...? No one knows... The only thing that matters now is to protect The Universe.

Bricks Trouble Origins is a unique arcade game that's great mix between a space shooter and a bricks breaker. Player controls small ship using accelerometer controls and one touch for shooting/acceleration. His objective is to form full rectangles and squares out of uneven figures made of mysterious bricks. The bigger figure the higher the score which is accompanied by Jed's funny comment. Game picks up the pace the longer player stays alive. It's an endurance game which puts player's skills and reactions to the toughest of tests.
