

ShareTool 1.2.6 and Mega Discount week now available from Yazsoft

Published on 02/06/09

Yazsoft has released a major new update to ShareTool. Developed for Mac OS X 10.3.9 or later, ShareTool lets you connect to all of the Bonjour services on your home or office network from anywhere in the world securely over a 100% SSH encrypted connection. This includes iTunes Music Sharing, Screen Sharing, File Sharing, printing, and much more. No configuration. No complication. No server or technical skills required. Just a mouse click.

Chicago, Illinois - Yazsoft has released a major new update to ShareTool. Developed for Mac OS X 10.3.9 or later, ShareTool lets you connect to all of the Bonjour services on your home or office network from anywhere in the world securely over a 100% SSH encrypted connection. This includes iTunes Music Sharing, Screen Sharing, File Sharing, printing, and much more. No configuration. No complication. No server or technical skills required. Just a mouse click. ShareTool also works with VPN connections. For anyone that's been itching to get Bonjour working over VPN, ShareTool is for you!

What is ShareTool and why should you care?

Scenario: You've just purchased a brand new iMac and MacBook and are simply loving it. You've set up your home or office network exactly the way you want it. You have file sharing between the two machines and can transfer your documents easily between them; you can listen to your iMac's iTunes Library from the MacBook and view your MacBook's iPhoto Library from your iMac. Everything on your network works exactly as you want it to and life is beautiful.

What happens when you have to leave (i.e. work or travel) the comfort of your new custom configured network? Wouldn't it be nice to know that with one mouse click you will be able to access almost everything you've just setup from anywhere in the world securely? Before ShareTool, this was simply not possible without an extremely (if at all possible) complicated setup even for those in the know. Not anymore! With ShareTool, that complex procedure is reduced to a simple mouse click and as a result, yes, you can be at two places at the same time!

ShareTool lets you access all of the Bonjour services on your home network from anywhere in the world. This includes iTunes Music Sharing, Screen Sharing, File Sharing, printing, and more.

With ShareTool, you can listen to your entire iTunes music library at work, control the screen of any of your home computers, or grab that important file you forgot to bring with you. And this is simply the tip of the iceberg. With ShareTool, it's as if you've never left your own network. It's Back to my Mac - on steroids.

Some Key New Features in ShareTool:

- * Simple Setup: ShareTool automatically configures routers supporting NAT-PMP or UPnP
- * Easy Access: Remote services automatically appear in Finder, iTunes, and other applications
- * Compatibility: ShareTool enables remote access for any application or service that advertises itself using Bonjour and runs over TCP/IP
- * Security: All network traffic is strongly encrypted. Access to your services requires your Mac OS X username and password
- * Dynamic domain name support
- * On the fly compression: Transfer large files quickly
- * Secure web browsing: surf the internet using your own browser securely

* and much more

What's New in version 1.2.6:

- * New: ShareTool now displays a warning when more than one copy of ShareTool is sharing on the same network
- * New: ShareTool can now be configured to work more efficiently with VPN connections
- * New: Double-clicking on a Bonjour service now connects to it directly
- * New: Emails sent out by ShareTool now includes both the external and the local IP address
- * New: "Browse Web Securely" is now disabled when connecting through a VPN
- * New: Added a preference to resize main window when services are added
- * New: ShareTool displays more info in the Dock menu
- * Updated: "Connect through proxy" is now under the Connect tab
- * Updated: Several tweaks and enhancements to the remote printing feature set
- * Updated: ShareTool now saves to Documents folder and prints to the default printer automatically
- * Updated: German, French, Polish, Spanish translations
- * Other: Various internal tweaks

Supported Languages:

- * US English, French, German, Polish and Spanish

System Requirements:

- * Requires Mac OS X 10.3.9 or later; Leopard ready
- * 22 MB Hard Drive Space
- * Internet connection
