

## Speed Tracker for iPad - Everything you need in just One application

Published on 05/25/12

AppAnnex LLC today announces Speed Tracker. GPS Speedometer and Trip Computer 4.0, the latest version of their popular navigation app for iOS devices. With Speed Tracker, automatically record your location, speed, time, distance and much more. View your trips, compare them, export your data and even share with friends and family via Facebook, Twitter or email. Version 4.0 new improved user interface designed especially for big iPad screen and gorgeous retina graphics.

Feasterville, Pennsylvania - AppAnnex LLC today proudly announces the worldwide availability of the newest version 4.0 of Speed Tracker. GPS Speedometer and Trip Computer. Just in time for the summer driving season you can now use Speed Tracker to full extent on iPad. Speed Tracker did a great job by combining GPS speedometer, Trip Log and Trip computer in one unique application. No more need for endless list of applications on your iPhone and iPad. Just take Speed Tracker app with you and automatically record your location, speed, time, distance and many many more.

Version 4.0 new improved user interface designed especially for big iPad screen and gorgeous retina graphics.

Speed Tracker has lot of build-in features that help you to gather all the necessary trip statistics while driving. Before going on a trip, start the application and enjoy. Speed Tracker will do all the automatic calculations and save all your stats.

Build-in GPS navigator will help you not to get lost. You can always switch to navigation mode and check your current position on the map together with the whole distance you've already covered.

And with Trip Log and Trip Computer you will always have the access too all you trips. View your trips, compare them, export your data and even share with friends and family via Facebook, Twitter or email.

"This is amazing! I'd never thought it would be THAT easy. I've been using it for 2 weeks already and it's becoming even greater. With only one finger tap you have the access to Speed Tracker, GPS Navigator, Trip Log, Trip Computer and HUD - which is a mind-blowing thing!" - said Chris Wilson, NY taxi driver.

Device requirements:

- \* Compatible with iPhone and iPad
- \* Requires iOS 4.0 or later
- \* Size 17.3 MB
