

Plyxim announces Exibia 1.4 - Video Scheduling Software for Mac OS X

Published on 02/10/09

Plyxim, LLC. has announced Exibia 1.4, their broadcast scheduling application for Mac OS X. Exibia allows clients in a multi-user, multi-platform environment to upload and schedule QuickTime-compatible videos to a centrally located server. Version 1.4 introduces a "Play Now" feature, allows for the scheduling of videos to the minute, and the ability to log in to the Exibia Web Client as an administrator. It is a free update for current Exibia users.

Raleigh, NC - Plyxim, LLC. has announced Exibia 1.4, their broadcast scheduling application for Mac OS X. Exibia allows clients in a multi-user, multi-platform environment to upload and schedule QuickTime-compatible videos to a centrally located server.

The Exibia Server, connected to a cable television (CATV) system for broadcast, handles the scheduling and playback of video content. Users of any platform can easily upload and schedule videos for playback using their web browser, including iPhone or iPod touch. Version 1.4 introduces a "Play Now" feature, allows for the scheduling of videos to the minute, and the ability to log in to the Exibia Web Client as an administrator. It is a free update for current Exibia users.

System Requirements:

Exibia Server is a universal binary that will run on any Macintosh computer capable of running Mac OS X 10.4.2 or greater with an available video output. A G4, G5 or Intel processor is recommended. A large hard drive is recommended for video storage. Many Exibia users run Exibia Server on a Mac mini.

Pricing and Availability:

\$499 (USD) per Exibia Server License. One license allows Exibia Server to run on a single Macintosh computer with unlimited Exibia Client and Exibia Web Client use. Exibia 1.4 is available today. A time-limited, fully-functional demo is available for download their website.
