

FmPro Migrator 4.63 - Adds Value List and Custom Function Migrations

Published on 02/11/09

.com Solutions Inc. enhances FmPro Migrator Developer Edition 4.63 with support for migrating value lists and custom functions. FmPro Migrator Developer Edition makes it possible for developers to save many hours of manual labor by automating the copying of Tables, Fields, Relationships, TOs, Value Lists, Custom Functions, Layouts and Scripts between FileMaker Pro Advanced database files.

Fremont, CA - .com Solutions Inc. Enhances FmPro Migrator Developer Edition 4.63 With Support for Migrating Value Lists and Custom Functions. FmPro Migrator Developer Edition 4.63 from .com Solutions Inc. has been enhanced with support for copying Custom Functions and Value Lists between FileMaker Pro Advanced database files when performing Table Consolidation projects.

FmPro Migrator Developer Edition makes it possible for developers to save many hours of manual labor by automating the copying of Tables, Fields, Relationships, TOs, Value Lists, Custom Functions, Layouts and Scripts between FileMaker Pro Advanced database files.

FmPro

Migrator Developer Edition utilizes QuicKeys(MacOSX)/WinAutomation(Windows) shortcuts to drive the FileMaker Pro Advanced graphical interface to build the objects in the consolidated destination database file.

Automated re-mapping of TOs is performed within each script and layout object. Script and layout dependencies are resolved during the automated two-pass processing of scripts and layouts.

FmPro Migrator Developer Edition creates both static and dynamic Value Lists, with the custom values automatically filled in for static Value Lists. Dynamic Value Lists are created as placeholders for further manual customization by the developer. Static value list items and Custom Function code can also be edited within FmPro Migrator Developer Edition after being imported from the FileMaker DDR XML file.

FmPro Migrator Developer Edition 4.63 also includes cosmetic improvements to the FileMaker Pro layouts generated from Bento 2.x files, including the display of media fields, file list, IM list and URL list portal fields. This release also fixes an issue involving the conversion of FileMaker Pro relationships to SQL databases, with specific corrections within the Oracle relationships SQL code.

FmPro Migrator Developer Edition is priced at (\$200) per developer and includes a copy of FmPro Migrator Developer Edition for both MacOS X (Universal Binary) and Windows platforms. Existing FmPro Migrator Developer Edition customers may upgrade to FmPro Migrator Developer Edition 4.63 at no charge.
