

World's First Cloud-based Font Server Introduced by Insider Software

Published on 06/05/12

California based Insider Software today announced FontAgent Pro CloudServer, the first cloud-based font server offered as an Internet service. FontAgent Pro Server CloudServer is the world's first and only cloud-based solution for managing, distributing and synchronizing fonts across creative workgroups in agencies, small businesses and large enterprises. Users can now store their fonts in the cloud and access them from anywhere.

San Jose, California - Insider Software today announced FontAgent Pro CloudServer, the first cloud-based font server offered as an Internet service. Using CloudServer, organizations can get the power of enterprise font management as they:

- * Maintain a centralized, cloud-based library of verified fonts
- * Synchronize fonts across all their users
- * Forego the cost and administration of font server hardware and software
- * Get free client and server software updates immediately upon availability
- * Enjoy free access to a vast range of print and web fonts
- * Subscribe to font management services for a low, predictable fee
- * Eliminate separate software maintenance costs

No Server Hardware Required:

With FontAgent Pro CloudServer you don't need to purchase, manage and maintain expensive server hardware and software to manage your fonts and creative workflow across the enterprise. Instead of having to invest time and money on additional infrastructure, FontAgent Pro CloudServer provides powerful font management on a subscription basis. No server software installation or network configuration is required, enabling organizations to lower IT costs by using CloudServer to replace the complexity of server setup and maintenance.

Centralize and Share Your Fonts for Consistent Control:

FontAgent Pro CloudServer includes all the tools required to deliver unrivaled font management functionality to all users in an organization as it:

- * Creates a centralized library of fonts of virtually any size that licensed users can share
- * Downloads fonts to user workstations automatically
- * Automatically removes fonts from user workstations
- * Provides and enforces consistent font usage across all users and projects
- * Ensures font license compliance

Simplicity and Consistency for CloudServer Users:

When users of FontAgent Pro CloudServer login for the first time, they install software, and fonts automatically download to their computer. Subsequently, FontAgent Pro automatically logs into the CloudServer and maintains their font collection, keeping it consistent with enterprise font licenses and the requirements of current projects.

The Power of Professional Font Management:

FontAgent Pro CloudServer delivers all the power of the top-rated FontAgent Pro font manager, which enables Mac and Windows to access, search, preview and print fonts as well as auto-activate fonts in top design apps including InDesign, Illustrator, Photoshop, InCopy, QuarkXPress and other Mac OS X applications.

Fast, Easy User Administration:

FontAgent Pro CloudServer administrators can authorize users, designate who can upload

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

fonts to the server, and specify which fonts get automatically delivered to which users. The CloudServer also enables them to manage font licenses and track their usage in real-time.

No More Upgrade Fees:

After a free trial period, FontAgent Pro CloudServer is available by subscription and includes the use of the FontAgent Pro font manager, CloudServer access, free software updates, and access to web fonts, as well as centralized font storage and backup. Introductory prices range from \$3.50 to \$6.95 a month per user. For more information, visit fontsinthecloud.com, email cloud@insidersoftware.com, or call Insider Sales at 866-366-8778 or 1-408-871-9933.

System Requirements:

To access FontAgent Pro CloudServer, you need a broadband Internet connection.

CloudServer

users need a Macintosh running OS X 10.6 or later, or a PC running Windows 7, Vista or XP.

About FontAgent Pro CloudServer:

FontAgent Pro Server CloudServer is the world's first and only cloud-based solution for managing, distributing and synchronizing fonts across creative workgroups in agencies, small businesses and large enterprises. For a low subscription fee, organizations can license its unrivaled power and performance to solve creative workflow, font distribution and license compliance challenges while enjoying access to software updates and open source fonts - and without the need for server hardware.
