

CurrencyGo 2.8 for iOS: Multiple Source Currency Exchange Rate Converter

Published on 06/06/12

Moscow based Meat Tree today announces CurrencyGo 2.8 for iOS, an update to their currency exchange rates converter that includes multiple data sources. This app calculates exchange rates for Paypal, Bloomberg, International Data Source, European Central Bank, Central Bank of Russia, OCBC. This update features added OCBC Bank currency rates, supports conversion fee calculation, and is available on the iPad.

Moscow, Russian Federation - CurrencyGo 2.8 is a currency exchange rates converter with multiple data sources available for iPhone, iPad, iPod touch. It calculates exchange rates for Paypal, Bloomberg, International Data Source, European Central Bank, Central Bank of Russia, OCBC.

Why CurrencyGo:

- * Multiple data sources
- * More than 160 currencies
- * Offline mode
- * Simple, user friendly interface

Main Features:

- * Currency conversion
- * Exchange rates
- * Favorite currencies list
- * Currency conversion fee
- * Currency request
- * Base currency auto-detection

CurrencyGo offers users the basic tools needed for quickly gathering currency exchange rate information. The simple, friendly interface allows users to change their 'base currency' as well as add multiple foreign currency exchange rates at a quick glance. While many currency exchange rates converters offer only single data source at a quick glance very few offer a multiple data sources and exchange rate calculator.

What's New in this Version:

- * CurrencyGo now available on iPad
- * Added OCBC Bank currency rates
- * Conversion fee calculation supported

Language Support:

American English and Russian

Device Requirements:

- * iPhone, iPad and iPod touch
- * Requires iOS 4.2 or later
- * 1.7 MB.

Pricing and Availability:

CurrencyGo 2.8 is only \$0.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Travel category.
