

Tension Software releases Invoices 2.3 - Manage and Print Invoices

Published on 02/16/09

Tension Software has announced the release of Invoices 2.3 for Mac OS X. Invoices allows anyone to create and manage invoices in a easy and effective way. The layout is based on multiple panels. When selecting an element will make details to be visualized in another panel, a common layout for many Mac applications. Version 2.3 adds new features as well as new number formatting for Japan and other countries using currency without decimals, with various bug fixes.

Milan, Italy - Tension Software announces release 2.3 of Invoices for Mac OS X. Invoices is a native Cocoa application to create and manage invoices on Mac. The application has features that makes it unique. It allows management of invoicing in a easy and effective way. Application layout is based on multiple panels where selecting an element make details to be visualized in another panel, a common layout for many Mac applications. in that way a Mac user is in a friendly enviroment from the start using the application.

After inserting in Invoices, one time, the specific data regarding his/her own needs, the user is able to make and manage invoices in their own language and according with their own country rules. Creating and filling data inside a new invoice is easy and fast. Invoices allows to create a new invoices with all data without using the keyboard, only with the mouse and all from a single panel view.

The application allows the user to create two different type of invoices , 'Plain' and 'Table', where description of sold goods and services are managed in a different ways. Invoices calculates automatically totals and taxes, in accordance with the setup the user specified using his own country rules. The application allows to view the invoice in a WYSIWYG (What You See Is What You Get) mode and see it as it will be printed. Invoices allows to filter and sort invoices by date, numbers, period, customer and payment status. Grand totals are calculated on the filtered invoices

With Invoices, inside the packages available at the producer site, is available a short document with the title 'Invoices in Ten Steps' explaining in a short way how to start using Invoices. Inside the application is always available the online help system.

Invoices is entirely written in Objective-C using Macintosh Cocoa library, its native for Mac an realized for Mac only, this to have a fast execution and an elegant interface without any compromises. Data are saved on disk in native format using CoreData SQL libraries included with Mac OS X.

System Requirements:

Invoices requires to run Mac OS X 10.4 (Tiger) or Mac OS X 10.5 (Leopard)

Pricing and Availability:

License price of Invoices is US\$ 35 and is downloadable from producer site. Application is continuously upgraded and upgrades are free for registered users. This new releases add new features and new number formatting for Japan and other countries using currency without decimals, plus various bug fixes.
