

Zevrix Solutions Releases LinkOptimizer 3.2.7 for Adobe InDesign

Published on 02/16/09

Zevrix Solutions announces the release of LinkOptimizer 3.2.7, a maintenance update to its workflow automation solution to optimize link size and resolution for Adobe InDesign. LinkOptimizer allows to reduce the size of InDesign jobs and increase the processing speed by eliminating excessive image data. The update allows to process a wider range of links by ignoring small rotation angles occasionally applied by InDesign to some images.

Toronto (ON), Canada - Zevrix Solutions announces the release of LinkOptimizer 3.2.7, a maintenance update to its workflow automation solution to optimize link size and resolution for Adobe InDesign. LinkOptimizer allows to reduce the size of InDesign jobs and increase the processing speed by eliminating excessive image data.

LinkOptimizer automatically reduces the image resolution, scales and crops the images in Photoshop according to their dimensions in the InDesign document and the target resolution specified, and reimports them to InDesign at 100%. In addition, LinkOptimizer can automate the image color conversion, sharpening and merging of layers, as well as run Photoshop Actions during processing.

The new update allows to process a wider range of links by ignoring rotation angles smaller than 0.01 degree. InDesign occasionally applies small rotation angles to some links which prevented LinkOptimizer from cropping the images.

Pricing and Availability:

LinkOptimizer 3.2.7 can be purchased from the Zevrix Solutions web site, www.zevrix.com, for \$139.95 (USD), as well as from authorized resellers. Demo is also available for download. Upgrade to LinkOptimizer 3.2.7 is free for licensed users of version 3 and up, and \$40 (USD) for the users of earlier versions. LinkOptimizer is available for Mac OS X 10.4.2 and higher, a Universal Binary, and works with Adobe InDesign CS-CS4.
